DUMFRIES, VA

February 2018

C3R has been awarded a contract to provide upgrades to the infrastructure of the United States Special Operations Command (USSOCOM)- Joint Special Operations Command (JSOC) facilities in Amman Jordan. The C3R team will provide these upgrades to improve the security and protection of the military and civilian forces operating in the Central Command Area of Operations. C3R is able to complete this work using its capabilities to develop and improve the Electronic Security System (ESS). This project is one of the many projects C3R has been able to complete in the last two years. We have leveraged our ability to develop solid relationships with teaming partners both small and large to complete security projects worldwide. C3R has teamed with SigNet Corporation to complete this project.

C3R has developed strong capabilities in the design, installation, upgrades, and maintenance of security systems including access control, intrusion detection, and video surveillance systems. Additionally, C3R provides comprehensive design and service for integrated electronic security systems for buildings. C3R provides all of these support services to the following organizations: United States Army Corp of Engineers (USACE), United States Nuclear Regulatory Center (USNRC), United States Army Womack Army Medical Center (USAWAMC), and United States Army Network Enterprise Center (USANEC). We design, fabricate, and install control access areas and systems and we install, maintain, service, and repair Lenel Security systems. C3R is responsible for the installation and upgrades of existing Closed Circuit Video System (CCVS) equipment and video management application. We provide maintenance, service, and repair of all components to the CCTV systems. For all of our customers, we provide labor, supervision, management, license permits, and material in supporting system security.

The C3R team is responsible for the sustainment of the security system by ensuring it is in accordance with the U.S. Government requirements and the Department of Defense Manual for Integrated Security Systems. The C3R teams look forward to providing continued support to existing customers, while sharing our strong capabilities in integrated security systems with new clients.
